Art Unit: 1631

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23, 35-40, 43-50, and 55-65, drawn to nucleic acid assays, classified in class 435, subclass 6.
- II. Claims 24-32, 74, and 75, drawn to computer readable media and electronic systems containing biological data, classified in class 702, subclass 19.
- III. Claims 33, 34, 66-73, 76-92, and 94-123, drawn to methods for assessing risk for disease, classified in class 702, subclass 19.
- IV. Claims 41 and 42, drawn to methods of treatment using compounds of undisclosed nature, classified in class unknown, subclass unknown.
- V. Claims 51-54, drawn to nucleic acids and kits, classified in class 536, subclasses 23.1 and 23.5.
- VI. Claim 93, drawn to methods of making a request for information and passing along the information received, classified in class unknown, subclass unknown.

The inventions are distinct, each from the other for the following reasons. The methods of Group I may be practiced independently of the methods of each of Groups III, IV, and VI. The nucleic acids and kits of Group V have uses other than in the methods of Group I (*e.g.*, in affinity chromatography). The computer readable media and electronic systems of Group II have uses other than in the methods of Group III (*e.g.*, for complex computations not related to gene F2). The computer readable media and electronic systems of Group II are not needed to practice the methods of either of Groups IV or VI. The computer readable media and electronic systems of Group II are materially different from and are therefore independent and distinct from the nucleic acids and kits of Group V. The methods of each of Groups III, IV, and VI may be practiced independently of one another. The nucleic acids and kits of Group V are not needed to practice the methods of any one of Groups III, IV, or V.

Art Unit: 1631

To search any two groups as outlined above would create an undue burden for the U.S. PTO because the searches of the non-patent literature are not only non-overlapping to any appreciable extent, but are also divergent in nature.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Reminder Regarding *In re Ochiai* and *In re Brouwer*

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. Process claims that depend from or otherwise include all the limitations of the patentable product will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder.

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
